**This book is dedicated to:**

*The great healing energy medicine of Biomagnetism  
And all people who strive to use it for a better quality life.*

Active in Research and Development since 1979, under the auspices of the Foundation for Magnetic Science, BiomagScience (formerly Magnetizer Biomagnetic Laboratories) has led in the evolution of Biomagnetism to create the most powerful, lightweight, certified BioMagnets and the most advanced, step-by-step scientific therapy protocols to address over 170 simple, acute and chronic medical conditions. Our research and associated practitioners, clinics, and medical institutions are devoted to providing the extraordinary science of Biomagnetic Energy Medicine and its ability to support and rapidly progress the body's healing mechanisms.

Through years of research, therapeutic development, and world-wide application of BiomagScience energy techniques, BiomagScience's protocols have demonstrated remarkable results on most medical conditions including breakthroughs that read like miracles. Besides helping quickly resolve conditions like carpal tunnel syndrome, arthritis or chronic back pain, some protocols have awoken people from terminating comas, helped heal crushed splintered bones in two and half months instead of ten, regenerated severed nerves, helped resolve mid-stage MS, rebuilt herniated discs to full height; and the list goes on. These results are occurring every day throughout the world and are based on utilizing the correct magnetic field application to jump start and amplify the body's own natural healing.

The objective of this book is to provide the reader with the fundamentals and the most advanced Biomagnetic energy techniques available to help and enhance the body's ability to resolve pain, overcome illness and injury, increase wellness and vitality, and preserve optimal health.

Best of Health!
