

Solid State Monopolar Biomagnet Field Therapy

BiomagScience is the science of Biomagnetism in which specifically designed magnetic fields are used to energize and increase the Bio-Negative cellular voltage of the cells for pain relief and helping resolve simple, acute and chronic medical conditions.

When the cell's voltage/energy is increased, its metabolic and immune functions increase, and rapid healing is supported for health & wellness.

Used as a daily energy supplement, Biomagnetism helps increase vitality and maintain optimal health and longevity.

BiomagScience.Net

With Research starting in 1979, The Foundation for Magnetic Science's Biophysics Research, later changed to BiomagScience, has led in the development of:

1. Advanced breakthrough therapy protocols that are recognized and used by people, practitioners, medical colleges and clinics worldwide to treat acute and chronic health conditions with often miracle-like results.
2. The production of scientifically designed, properly powered, certified medical magnets.

Better Health through Supplemental Energy Medicine

BiomagScience Super Biomagnets

- **Neodymium State-of-the-Art, Super Powered Medical Biomagnets**
- **Small, Easy to Apply for Fastest Pain Relief & Healing Support.**
- **Color Coded Safety Cases: Green Bio-Negative • Red Bio-Positive.**
- **Raised lettering on Red Positive to feel correct polarity when out of sight.**
- **One & 2-Stack Bio-Negative & Bio-Positive therapy applications - Easy application on clothing or with bandaide, bandage or medical tape**
- **Three distinct sizes for correct tissue penetration for vitality, pain relief & advanced therapies for injuries, chronic illness and disease.**

Bio-Negative North Healing Green Polar Energy Explained

Reduces Pain • Increases & Normalizes Cellular Voltage/Health

- Immediately reduces pain • neutralizes positive charges of inflammation, oxidative stress & free-radical sites. Supports healing for most simple, acute and chronic medical conditions
- Increases cellular voltage which increases metabolic & immune functions for healing and maintaining vitality & wellness for a healthy and long life.
- Increases cellular transfer efficiency, nutrition & oxygen uptake & detoxification outtake
- Arresting effect on bacteria, viruses & sedating effect on nerve tissue. Helps immune function to fight colds, viruses & illness
- Calms & vasodilates blood vessels, helps coagulate cuts & heal burns

The **Negative Pole** is used with the **Positive Pole** in Advanced Circuit Therapies to energize & balance the biochemistry and regenerate soft, hard, and nerve tissue.

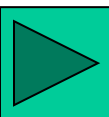

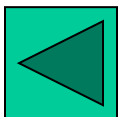

Daily supplemental **Negative Pole** energy provides high vitality, wellness and longevity • also defends against EMF.

Bio-Positive South Red Pole Polar Energy Explained

- Stimulating energy - must be used carefully as it has contraindications
- When applied separately, can cause a **Positive Acid chemistry** and acid-hypoxia creating a growth climate for bacteria, viruses, fungus, mold, parasites and cancer cells
- Used by practitioners in 20-minute therapies to help normalize hypo-active glands & organs.
- Increases inflammation and pain unless used and contained in Circuit Therapy with **Bio-Negative Energy** .
- Used with **Bio-Negative Energy** in Circuit Therapies such as MET (*Meridian Energizing Therapy*) or Regeneration of joints, soft, hard, and nerve tissue.

When using the Negative/Positive Circuit therapy, it is suggested to do the **Bio-Negative Daytime (sternum) therapy to maintain wellness and defend against any stray **Positive energy** from the Circuit.**

Cellular Voltage – The Snapshot of Cellular Health

Immediate Analysis of the Cellular State of Health

In 1939, the first Bioelectrical Impedance device was used to test cellular voltage. Through the years it has progressed technically to measure the body's health.

The technology works by running a slight electrical current through the cell's membrane [parallel capacitance] and measuring its impedance (resistance). The parallel capacitance resistance measures the cell's voltage.

Today, the standard FDA registered BIA (Bioelectrical Impedance Analysis) instrument provides a full systemic 'snapshot' of immediate data and analysis of cellular dynamics and architecture; providing information on an individual's state of health – whether it is static, progressing and/or regressing – all important data for the health care and research professional.

High voltage = good cellular function / good health

Low voltage = poor cellular function / poor health

The following BiomagScience BIA case studies provide an insight to how quickly Biomagnetic energy supplementation, when properly applied, helps to increase the cellular voltage/function and progress the wellness of the individual.

Cellular Voltage

Parallel Capacitance Health Tables

Females

Capacitance pF (pico Farads)	Cellular health based on parallel capacitance
Above 1009	Extremely healthy
774-1008	Optimal health
617-773	Average
460-616	Below average
304-459	Low energy
Below 303	Warning alert

Males

Capacitance pF (pico Farads)	Cellular health based on parallel capacitance
Above 1313	Extremely healthy
1003-1312	Optimal health
795-1002	Average
589-794	Below average
382-588	Low energy
Below 381	Warning - alert

The following BiomagScience BIA case study provides an insight to how quickly properly applied Biomagnetism increases an individual's cellular voltage and progresses the individual's health.

Note: Normally, a 6-month specialized nutritional diet, significantly increases the cellular voltage in most cases. The following case was stuck with malabsorption and the voltage would not increase. With one hour of BiomagScience therapy, the voltage increased over 100 points.

One-hour BiomagScience Therapy leads to 25-Year Recovery, Page 1

BIA – Parallel Capacitance Body Composition Report # 111804MW - Malabsorption

Subject History: 53 yr. old female, incapacitated and bedridden for 25 years with mal-absorption, fibromyalgia, CFS, brain fog, acute inflammation and pain.

Malabsorption is when the cell has so little voltage, it cannot pull in the necessary micro-nutrients to increase its energy – literally stuck in a Catch 22. The woman had been under the care of a multitude of practitioners who have not been able to help her. She even tried using improperly designed therapy magnets. She tests for chemical poisoning. Due to her mal-absorption, she cannot take any supplements; even a slight nutritional supplementation created an overload and throws her body into a crisis.

During the last three years prior to the BiomagScience therapy, her capacitance was very low only rising 25 points after multiple therapies, including a custom nutritional program. The subject's inability to absorb or detoxify made it very difficult for her health to improve and most therapies made her ill.

Date	18-Nov-04	14-Jun-05	14-Jun-05
Actual Cap:	400	400	507

Note: From Nov 4th to June 5th the subject's capacitance remained the same even with a diet high in nutrition – but minimal supplementation due to mal-absorption, which was typical of her fixed pattern.

After her first BIA test on June 14, 2005, another was performed after an hour of applying the Bio-Negative Energy on the back of her neck. Her cellular capacitance voltage rose 107 points from 400 to 507, indicating a large increase in the cellular voltage and function – and a breakthrough in progressing her out of malabsorption. Continued...

Continued Results of Subject 111804MW – Page 2

After the CVS therapy, the subject used BiomagScience Daytime, Nighttime, MET therapies and drank Bio-Energized Negative water. **Within a month of beginning the therapies, the subject was able to overcome the 25-year term illness from malabsorption and resume her favorite activity of singing and song writing with a band.**

The BiomagScience therapies provided the cellular voltage necessary to overcome the dysfunction of the cell's lack of energy to absorb the nutrients necessary to start healing.

Because of the immediate increase in cellular voltage, the cells were able to restart their natural ionic forces to be able to absorb and metabolize micronutrients/oxygen resulting in increased metabolic and immune functions which started her back on the road to full recovery within 30 days.

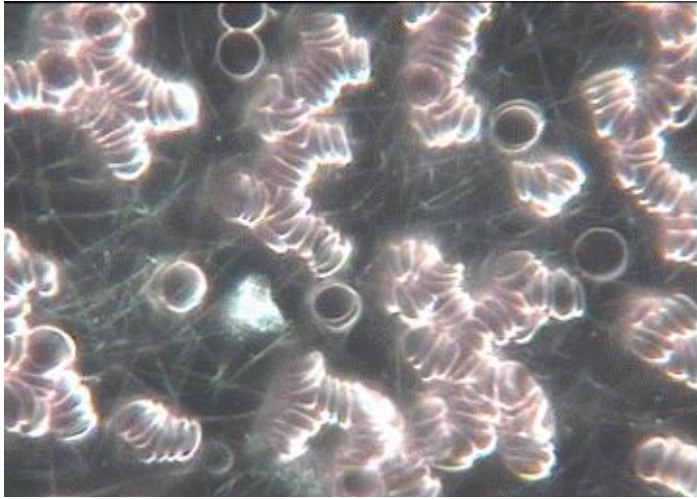

Within a year of the BiomagScience initial therapy, she was playing competitive tennis.

Visual Red Blood Cell Voltage Increases

With NO TREATMENTS that could help, the following microscopy shows the low-voltage RBCs (red blood cells) of a 48-year-old male, in acute pain and exhaustion for months from acute whiplash. The low-voltage RBCs have stacked together in the unhealthy Rouleau pattern responsible for continued poor health and often a precursor for heart attack and stroke in older individuals.

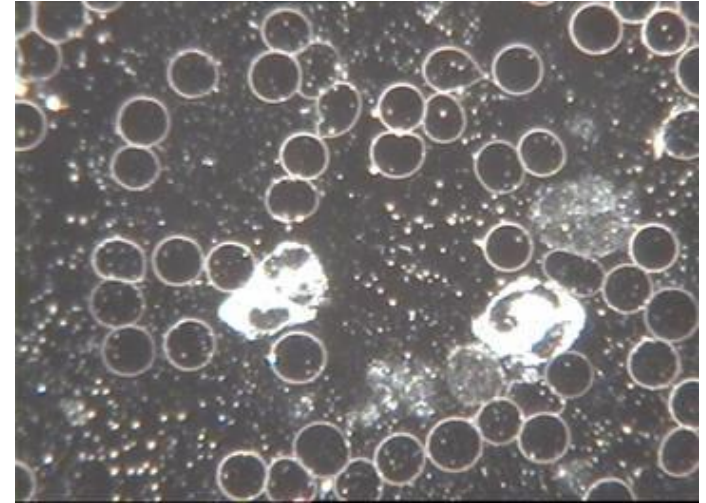

BiomagScience therapy immediately increased the cellular voltage within 1 hour. What is noteworthy is the RBCs carry the charge throughout the body and systemically increase cellular function for rapid healing and wellness. In this case the individual immediately had the energy to heal and overcome his trauma.

Before and After Energized Blood Tests Microscopy – Acute Whiplash

Page 1 of 2

Symptoms:
Nausea
Vomiting
Insomnia
Intense pain
Blurred vision
Unable to lie down & rest

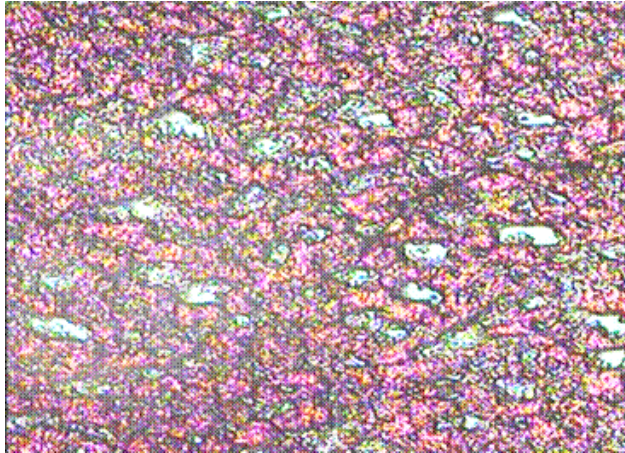

- **Blood Sample taken from a 48-year-old male, in acute pain and exhaustion from whiplash – very Thick Blood.**
- **Thick Blood: RBC's (Red Blood Cells) stacked in the very low energy Rouleau pattern suggests a toxic buildup and cellular mal-nutrition due to reduced cellular transfer. Thick blood also builds dangerous vascular plaque.**
- **Fibrin lines in background indicate systemic inflammation.**
- **Stacked RBCs indicate thick blood and decreased circulation to the injured site, leading to more pain, and increased free radical activity and cell death.**

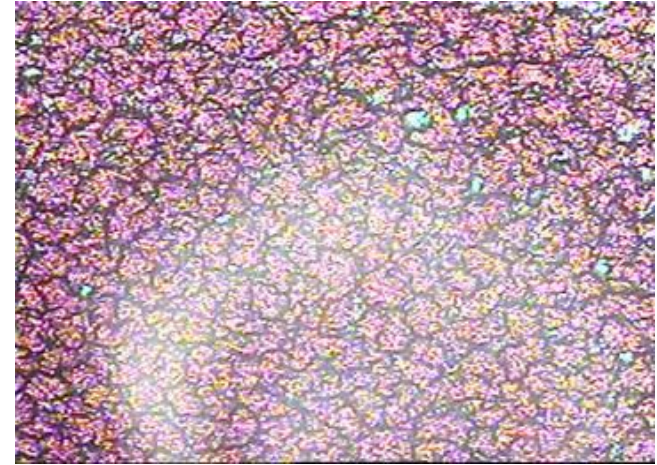

- **Sixty minutes after BiomagScience therapy the healthy Zeta (energy) potential is rein-stated and the blood is naturally thin and can provide better health.**
- **RBCs cells have separated increasing intercellular transfer of oxygen, nutrition and detoxification while helping eliminate plaque buildup.**
- **Better circulation and increased cellular voltage leads to increased immune functions & rapid healing**
- **Excess free radical activity from traumatized tissue resolves rapidly as health and wellness increases**

One of the most important & dramatic changes BiomagScience therapy produces in people ill with very low energy, is *the immediate natural thinning of unhealthy thick blood* and major reduction of free-radicals. Normally healthy thin blood is achieved by using a drug or months of a specialized diet & nutrition, physical-therapy, and lifestyle changes. With BiomagScience therapy, it only takes an hour or two of simply applying the Biomagnet.

Bowen Dry Cell Microscopy of Free Radical Sites – Acute Whiplash

Page
2 of 2

Sample taken prior to energy therapy

- Whitened areas indicate free-radical sites of oxidative stress to the tissue; these sites are positively charged.
- Tissue damage from the stress of the whiplash on the central nervous system along with the decreased circulation result in more free radical activity as well as more pain

Sample taken 60 minutes after energy therapy

- After applying the healing Bio-Negative energy on the sternum, the majority of these Positively charged free radical sites are reduced, healing or cleared all indicating a reduction of inflammation and its pain.

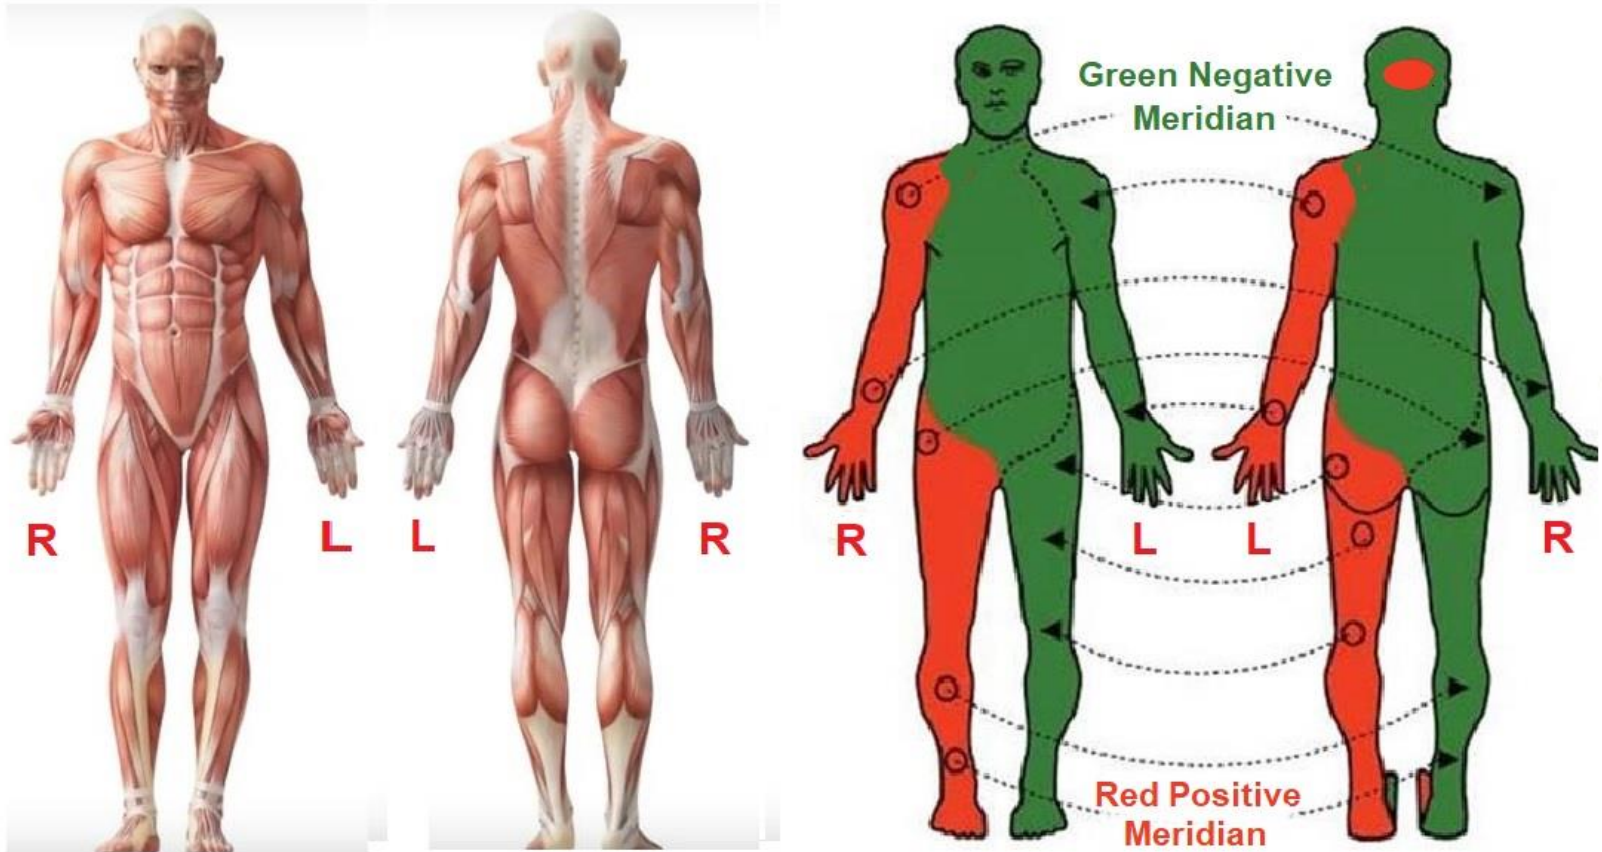

Conclusion on Clinical Case

Acute Whiplash: After 4 months of nausea, vomiting, insomnia, intense pain, & blurred vision from being unable to lie down & rest from his whiplash injury, within several weeks of the BiomagScience Whiplash & Daytime therapies, he was able to fully sleep through the night. After three weeks he changed therapies from the Whiplash to the lower CVS (Cerebral Vestibular System - 2-Stack Power Wafers green side on skin on middle back of the neck at the hairline). Three months later, he was able to go to work.

Bio-Negative Daily Energy Supplementation

Natural Blood Thinner, Increases Nutrition & Detoxification
Helps Prevent Stroke & Heart Attack

Biomagnetic Negative Meridian Placement for Pain - Anatomical View

If the pain is in the Red Positive Meridian, place the Green side of Biomagnet on the Green Negative Meridian directly opposite of the pain site and the healing energy will flow to Red Meridian to help heal the pain.

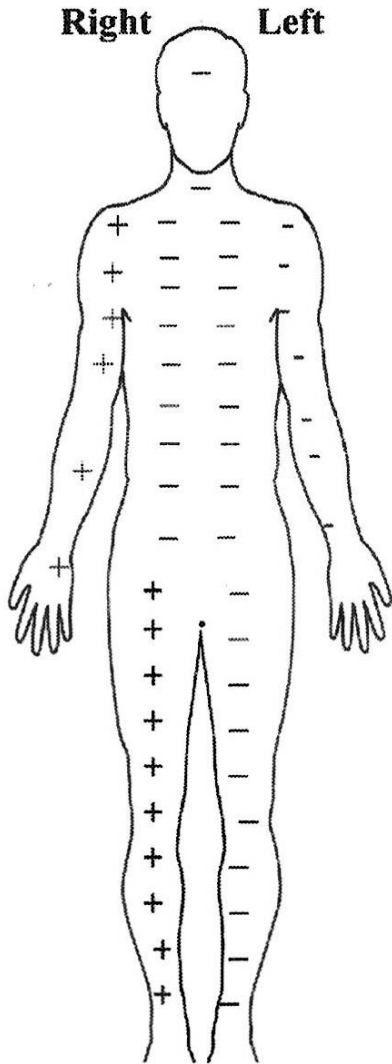

If the pain is in the Green Meridian, place the Green side of the Biomagnet directly on the site.

Example – carpal tunnel or tendonitis (pain) on the right hand or forearm, Green is applied on the posterior opposite side of pain in the Green Meridian. On the left arm, it would be applied on the anterior.

Daily Vitality and Health Maintenance Recommended for Everyone

1. **Daytime Therapy** is suggested to be used daily as an energy supplement from awaking to going to bed.

Place a 2-stack of Power Wafers Green toward the indentation of Sternum or several inches above for women who require the placement to go above the breasts. Place inside and outside of shirt, bra, or use bandaide or medical tape.

Warning: Acute Degenerative heart condition: Do not use the sternum as the Daytime therapy.

Use the **Lower CVS** (Cerebral Vestibular System) on the middle back of the neck at the hairline. Apply a 2-Stack of Power Wafers Green side to neck with a Power Wafer on each side of the Band-Aid or on the inside and outside of the collar of clothing if it stays against the neck.

2. **Nighttime Therapy:** Use a 2-stack of PWs Green down on top of head for 10 days instead of the Super Biomag as indicated in the first edition of **Conquering Pain book**. This will help re-orient the pineal gland for maximum melatonin output so important for good sleep and restorative functions. Many people use it continuously to enjoy better sleep.

Top of the head placement: Use a cap, bandaide if bald, a barrette or weave PWs into the hair by applying the 1st PW Green side down on head, pull the hair over it from each side and put the other PW over the hair. The PWs will hold each other in place all night. Red is up when properly applied.

3. **Energized Water:** Drink 3-4 glasses of Bio-Negative Structured water daily- See water chapter in *Conquer Pain* book for the important health benefits of increasing hydrogen ions to the glands and organs.

Red out, Green to skin

Red up, Green down

Advanced Therapies for Acute Chronic Conditions & Prep for Overall Healing Including Illness, Acute Injury, Circuit Therapy

The ATACC (Advanced Therapies for Acute Chronic Conditions) is an excellent pre-therapy to create a systemic healing terrain to support other therapies such as the back or knee Circuit Therapy, etc. The ATACC helps normalize gland/hormone output and organ/enzyme output, key messengers for proper nutrient and mineral targeting so Very Important in healing and regeneration of all tissue types.

1. **Step 1 - Initial Therapy - Do the OGE (Organ Group Energizing)** for 24 hours a day for 5 days (24/5) to elevate all the primary organ's energy at the same time. This protocol has helped awaken and heal individuals who were in the last stage of a terminating coma; it has also assisted many others who were chronically or acutely ill.

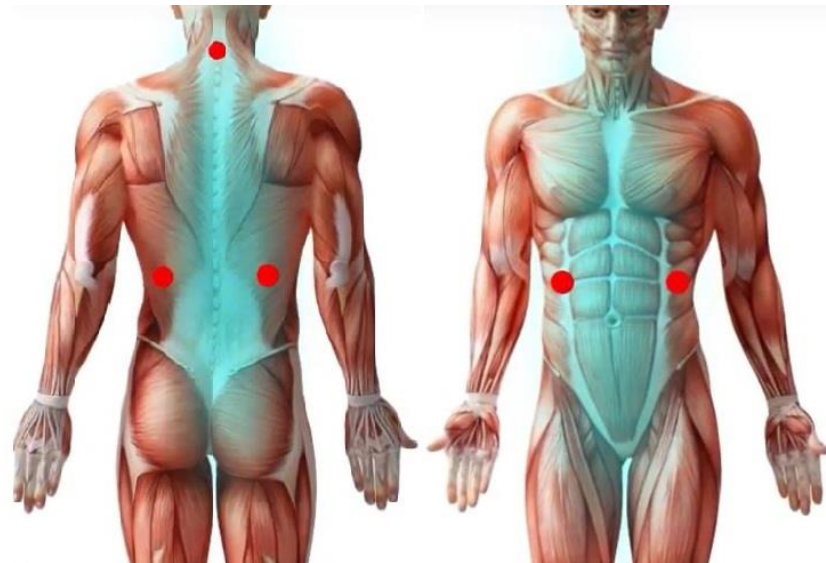

Using the self-grip bandage: wrap the bandage over each Regular Biomagnet Green side toward the skin over:
1. the liver under the right rib cage; 2. the pancreas/spleen area under the left rib cage; 3. each kidney on the back. Then place a Power Wafer on top of the bandage over each of the 4 Regulars and then wrap the bandage around one more time on top of the Power Wafers – that will hold the therapy placement. The self grip bandage can be renewed by washing it.

Place a 2-stack of Power Wafers with a bandaide on the lower CVS(back of neck on skin at hair line) as shown and wear the entire protocol 24/5 =24/7. the CVS placement is important part of the OGE protocol for uniformly For elevating the brain function energy at the same time as the primary organs.

MS or Parkinson condition: After the OGE for 24/7, continue using the liver placement with a Super Biomag or a 2-stack of Regulars Green side on the middle right lobe of the liver along with the lower CVS therapy for 2-3 months - Always remove CVS therapy during any MET, OMET, or Nighttime therapy.

Go to Step 2 (MET) once completing the OGE

Lower CVS, Liver, Spleen/Pancreas, Kidney Placement

Red out, Green to skin and neck

2. Daytime Therapy after OGE. During the daytime until bedtime, maintain a 2-stack of Power Wafers Green on sternum.

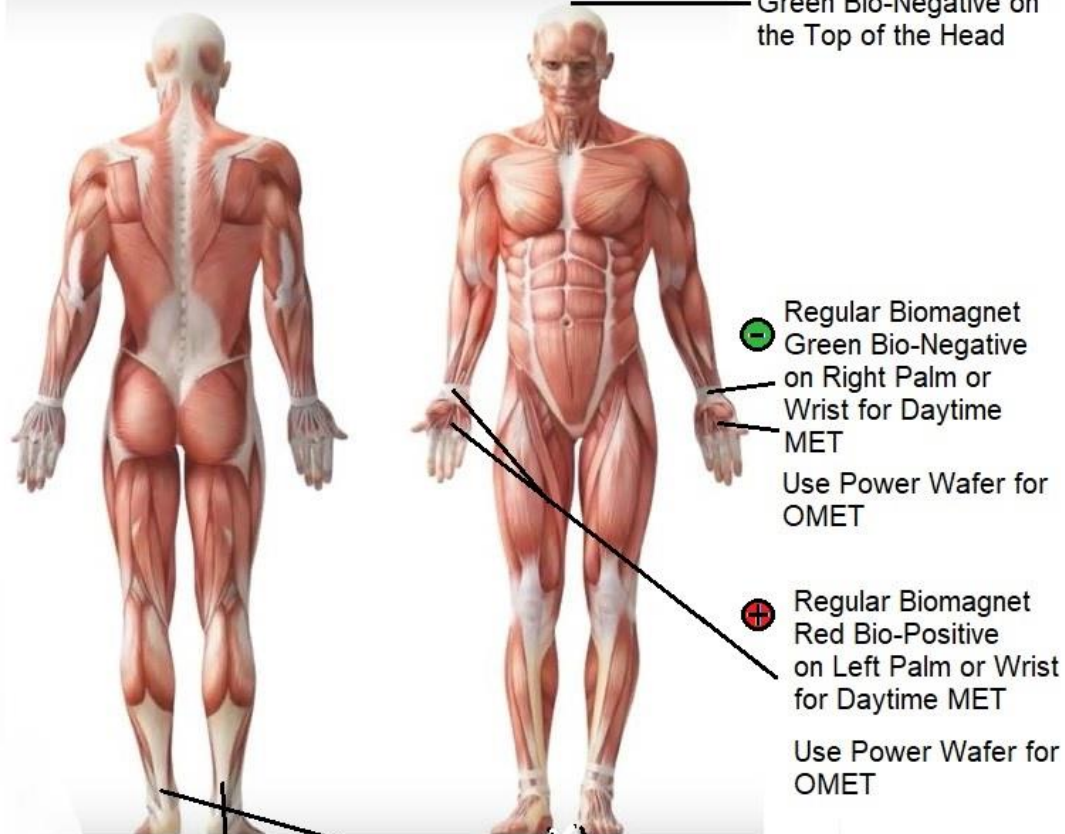

Warning: Acute Degenerative heart disease - Do not use the sternum for Daytime therapy - Use the lower CVS placement instead.

Red Bio-Positive on
left foot Arch or back of
Ankle for Daytime MET

Use Power Wafer for OMET

3. MET (Meridian Energizing

Therapy): The MET is a powerful therapy that energizes and balances the body's bio-chemistry helping it to overcome serious conditions. Highly useful for energizing and strengthening the nervous system and peripheral tissue.

With long-term chronic conditions, the powerful MET can be used up 2-3 times a day for 20-30-60 minutes for 10 days, then an hour a day for several months as necessary.

The Daytime sternum therapy can be used during the MET. The CVS therapy must be removed during the MET.

OMET (Overnight Meridian Energizing Therapy): Although the Daytime MET with the Regular Biomagnets is recommended for its much higher power to energize and balance the system much more quickly, the lower powered OMET for the longer sleeping period.

The OMET assists in energizing and balancing the biochemistry – a very important therapy in normalizing and maintaining health. OMET on page 8

The CVS therapy must be removed during the MET or OMET

4. General Nighttime Therapy: After the OGE and OMET, do the Nighttime therapy as shown above left. Use a 2-stack of Power Wafers instead of Super as indicated in the book Green on head for 10 days. Helps re-orient pineal gland for maximum melatonin output so important for good sleep and restorative functions. Nighttime Therapy can be continued indefinitely.

5. Energized Water: Daily – drink 3-4 glasses of Bio-Negative water for energy, increased nutrition & detox.

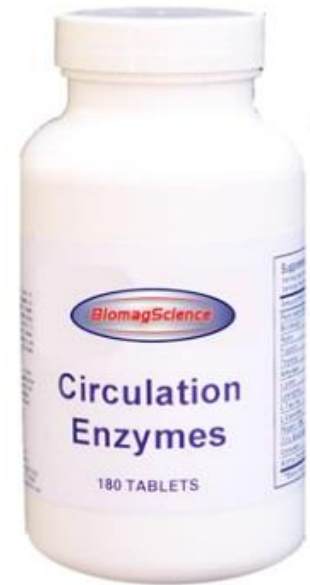

6. BiomagScience Activated Oxygen: It is important when overcoming chronic conditions to increase your oxygen levels Use 15-20 drops of Activated Oxygen in 4 glasses of Bio-Negative energized water daily for 2 weeks, then 2 glasses daily for several months and/or however much longer it feels good. Increased oxygenation helps overcome anaerobic pathogens such as Candida, etc.

Many people enjoy the increased energy so much that they continue using the oxygen in the Bio-Negative Energized water as a daily general supplement.

7. Ultimate Supplement hGH: It is advised that BiomagScience Ultimate Supplement hGH be taken on a daily basis for 6 months during the primary therapy period unless the individual is doing cancer therapies and is not advised. The Ultimate Supplement assists the body in producing new young cells.

8. Circulation Enzymes helps reduce vascular plaque helping reduce blood pressure which is very important for high blood pressure conditions. Used with energetic supplementation such as the Daytime therapy, it has reduced cellular plaque and helped resolve adult-onset diabetes by eliminating pancreatic cellular plaque. The normal term is 3 months.

Brain Re-Entrainment Therapy

Brain Re-Entrainment Therapy (BRT): The BRT helps heal and normalize neurological dissociative and hypotrophic optokinetic conditions such as: migraine headaches; infant manifest nystagmus with strabismus (blindness from lack of optokinetic development of the optic nerve, muscles and associative connective tissue); post-stroke motor functions; tremors; and depression by retraining and energizing the energy flow in the brain and increasing the energy in the neurotransmitter chemistry which helps signals clarify.

BRT has shown to help heal neurological problems by re-entraining & amplifying the correct electromotive flow of energy in the brain which supports normalization of dissociative issues that have taken place from a lack of proper growth, stroke, aneurism, or other issues that have led to neurological conditions.

Cont'd on next page.

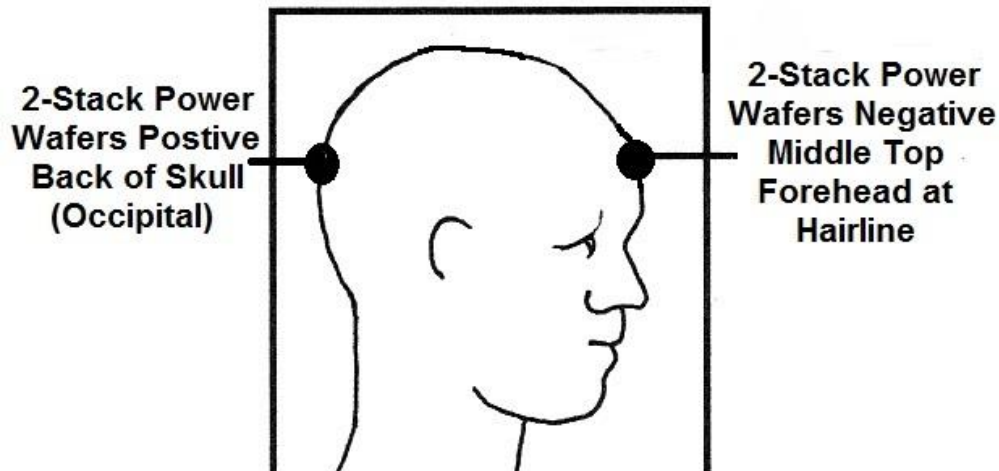

Brain Re-Entrainment Therapy Continued

During the day, the Bio-Negative Green side of the 2-Stack of Power Wafers is placed on the middle forehead with a band-aide or hat, etc.] at the hairline. This stimulates the brain's energy to reorient its natural flow from the frontal lobe through the brain to the back of the head (occipital) and down into the body . The forehead placement can be left on all day and can be taken off at night. It can be used for the head placement for the MET or OMET but must be taken off if the Nighttime therapies is applied.

The front forehead placement is generally applied for 3-6 hours or longer a day for 2-6 weeks [depending upon the therapy requirement) along with the Daytime Therapy (2-stack Power Wafers over the sternum *Heart Warning Condition).

Up to 3-6 times a day, a 2-Stack of Power Wafers Red side is placed on the occipital (back of head on skull in the hair (using a barrette, bandaide, hat, etc) – for 10 minutes, then removed. This provides an amplified healing circuit of the natural energy flow between the front (Bio-Negative) through to the back (Bio-Positive) of the brain to re-orient any improper flow or lack of (hypotrophic) development.

The CVS back of the neck placement cannot be done during the Brain Re-Entrainment therapy.

Circuit Therapies

**Broken Bones • Regeneration of Joint, Nerves, Tissue & Cartilage
Knees • Elbows • Shoulders • Hips • Back • Sciatica • Whiplash • Feet/Ankles**

Circuit Therapy. In the development of the back therapy using both positive and negative energy to increase the fluids to expand the tissue to relieve the pinched nerve and help heal and strengthen the muscles to maintain the re-normalized architecture to stop the back pain, we got a report from a nurse that her approximately 18% herniated discs rebuilt themselves to full height.

Based on that report, we developed other Circuit therapies with clients reporting fully regrowing connective tissue and spongy mass in knees and shoulders, etc. We also developed them for bone reunion, nerve regeneration.

Our systemic MET circuit has enabled a tremendous increase toward wellness for many people in helping energize and balance their entire body. A quadriplegic used it daily to walk again after 20 years.

Reports on Circuit Therapy have indicated that in long-term chronic cases like bone-on-bone knees shoulder cuffs, receive pain relief quickly, sometimes within several hours. But the knees, because of the constant daily weight bearing stress, it can take as long as 15-30 days to get pain relief, with 6-8 week healing term.

Important Basic Therapy First: Before using Circuit Therapy, it is advised to use the single Green Bio-Negative energy on the site in the correct meridian for 3.5 days. If there is pain relief, continue for another 7-10 days. If there is no pain relief, then use the appropriate Circuit Therapy.

Circuit Therapy uses both the Green Bio-Negative and Red Bio-Positive magnetic field placement. The following Pictures below indicate Circuit Therapy placement on the front and back of the affected joint – more information is available on pg. 147 of the Conquer Pain book.

Highly Recommended Supplement: Cetyl Myristoleate “CMO” (at vitamin stores or online) used twice a day has shown to help rapid support in healing connective tissue in joints and back pain when used with BiomagScience Circuit Therapy.

Cont'd on next page

Circuit Therapies

Step One - Circuit Therapy: Apply both Fields (front and back) of the circuit as shown on pictures below to initiate supportive healing for 10 days - only on the afflicted limb.

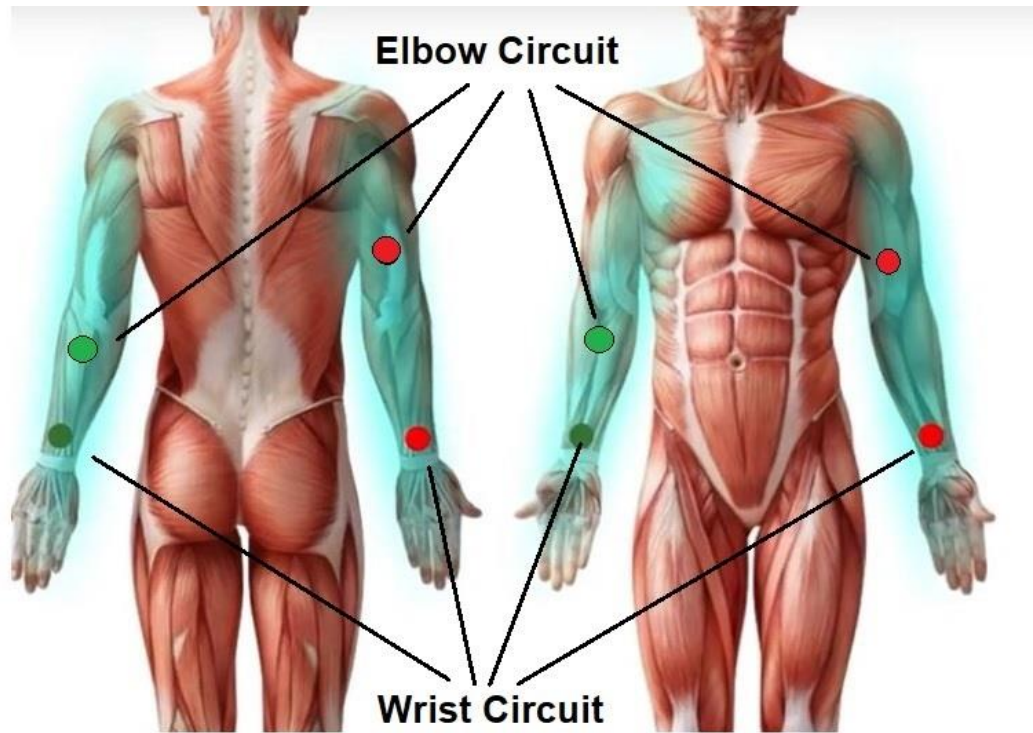

Step Two – Circuit Therapy: After the 10 days, remove the Red Positive Biomagnet(s) to the skin and move the Green Negative Biomagnet(s) from its location to the center of the circuit on its Negative meridian for another 10 days.

Note - If after removing the Red, the pain returns, relocate the Green & re-apply the Red circuit for another 10 days, then remove the Red & replace the Green in the center for another 10 days.

Circuit Therapies

Ankles, Foot Pain, Bone Spur Therapy:

Apply 2 x 2-stack Power Wafers as shown. When wearing with shoes, use only one Power Wafer on each placement location and move the back foot BioMagnet up so the shoe can go on.

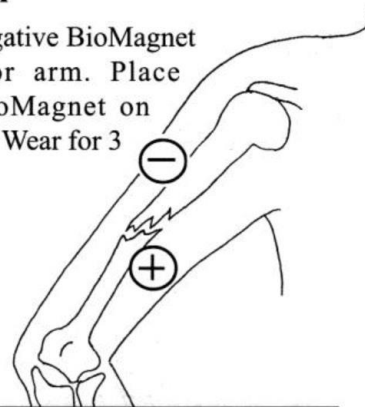

All Red and Green BioMagnet colors shown are the opposite color placed to the skin

Proper Polarity Placement for Fracture or Cartilage Repair

Right Arm

1.) Place Negative BioMagnet on posterior arm. Place Positive BioMagnet on anterior arm. Wear for 3 days.

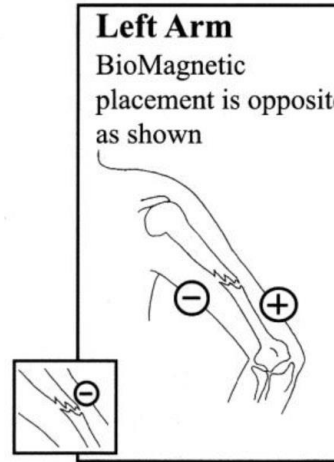

2.) Remove Positive. Adjust Negative as close to injury site as possible, retaining proper polarity.

Left Arm

BioMagnetic placement is opposite as shown

Broken Tibia: Right Leg

1.) Place Positive BioMagnet on anterior leg. Place Negative BioMagnet on posterior leg for 3 days.

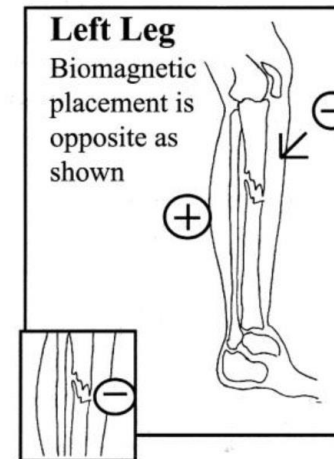

2.) Remove Positive. Adjust Negative as close to site as possible, retaining proper polarity.

Left Leg

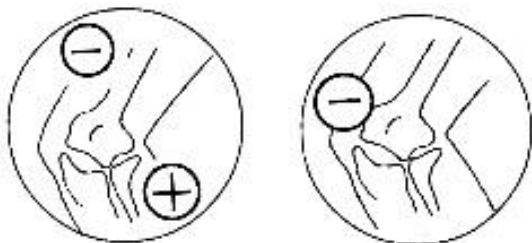

Biomagnetic placement is opposite as shown

Proper Polarity Placement for Fracture for Cartilage Repair

Right-Elbow Lateral View

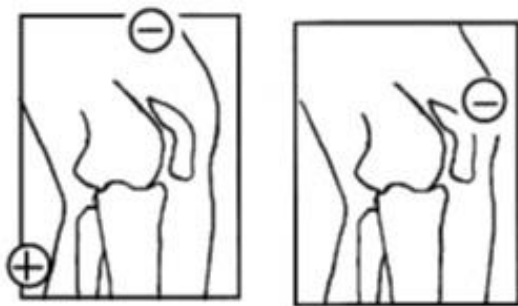

- 1) Place Negative on posterior of arm just above the injury and Positive on anterior arm just below injury . Wear for 10- 42 days depending upon severity of break. Normal healing time is shown to be 4 times faster.
- 2) Remove Positive. Adjust Negative on posterior injury site. Wear for 2-4 weeks.

Placement for the Left Elbow is same as shown on Left Knee.

Left-Knee Lateral View

- 1) Place Negative on anterior side of just above knee and Positive on posterior side just below knee. Wear for 2-8 weeks. Normal healing time is shown to be 4 times faster.
- 2) Remove Positive. Place Negative on anterior injury site. Wear for 2-4 weeks

Placement for the right knee is same as shown on right elbow.

Broken Bones: The application will require multiple 2-Stack of PWs & Regulars on arms and 2-Stacks of PW/Regular on legs, see pg. 149 in Conquer Pain Book and/or the Pictorial Guide for correct placement.

Nerve Regeneration

It has been shown that the electromagnetic forces from Biomagnetism can regenerate severed nerve cells. If the injury such as a broken neck, back, etc. just occurred, it is first important to reduce the inflammation at the trauma site or nerve breach with the Bi-Negative. Then with your medical practitioner's approval, apply the Circuit Therapy.

Spinal Regeneration Therapy Technique:

- 1) First apply Negative to the area to reduce swelling/inflammation. This may take 2-10 days.
- 2) After the inflammation is reduced, apply a Negative 2-Stack of Power Wafers 2 inches above the nerve breach/break and a Positive 2-Stack of Power Wafers 2 inches below the breach/ break.

No matter where the injury is, the Negative is always placed closest to the head in the Circuit.

If the injury is old, start with Step 2 above. The therapy term may take months, but has shown results of new feeling, movement and eventual healing within a reasonable time.

Examples of Nerve Regeneration

After 20 years, doctors told quadriplegic middle-aged male that he could never walk again. He started the MET (Meridian Energizing Therapy) religiously and started to get feeling after a number of months. Working at it over a year, he got back full feeling, motion and normal use of his body.

Unfortunately, the individual had not known that the spinal nerve regeneration protocol was available and may have been able to heal his spinal break much more quickly.

Nerve Regeneration

Another life-long quadriplegic started to get motion back after the spinal nerve regeneration circuit was applied. Within a month of the application, the individual was able to raise his arm slowly and shake hands with our representative who had directed the therapy.

Unfortunately, we lost contact with the man and do not have any follow-up. However, according to what we have learned and the fact that his spinal cord had already shown considerable healing, it is probable that he may have normalized to be able to walk again.

In another case, after 6 months of physiotherapy, the doctor explained to a 72-year-old man whose nerve in his knee was severed during surgery, that he would never be able to feel anything from his knee down or ever have full motion of his leg again. (See video under Media at BiomagScience.net.)

Subsequently, he applied the Knee Circuit Therapy. In less than six weeks, his nerve and connective tissue regenerated for full feeling, motion, and he was able to walk normally again.

Post PEMF Therapy Syndrome – Pg 1

Upon BiomagScience publishing its malabsorption results, individuals, who had become acutely ill from Pulsed Electromagnetic Field (PEMF) therapy, contacted us for help. As a result, we were apprised of this syndrome, which is the same as the post MRI syndrome for people with very low vitality (cellular voltage).

The post-PEMF therapy syndrome appears to manifest in people who were ill prior to their PEMF therapy; subsequently to the therapy, developing chronic malabsorption and its various manifest conditions: EHS (extreme hypersensitivity) to EMF, chemicals, and mold; pain, inflammation, fibromyalgia, candida, chronic fatigue, headache, brain fog, gut issues, high bacterial and/or viral loads, etc. In more than several cases, the disorientation and illness from the PEMF therapy had continued until doing our therapy – one case for example lasting 6 months.

In trying to resolve their original illness, they tried PEMF therapy. Unfortunately, it backfired with extreme disorientation (brain fog) and the development of more acute conditions of malabsorption..

One common thing stuck out when first talking with them: their voices very small; they had so little energy, it was hard to hear them – a result of extremely low vitality.

Fortunately, our “Baby Steps” therapy for low-voltage malabsorption, enabled them to start healing their health issues. The Baby Steps therapy slowly introduces the Biomagnetic energy over a period several weeks to prevent the cells energizing too fast and having a Herxheimer event. (see BiomagScience Research for 15 to 25-year bedridden malabsorption cases).

The basis of cellular health is:

Normal Cellular voltage = Good health ■ Low cellular voltage = Poor health, Illness, disease

A healthy cell’s interior/cytoplasm has a voltage of approximately -25mV (millivolts – thousandths of a volt) and its membrane -800pF to 900pF (pico Farads – billionths of a volt). Cells with general lower voltage indicate dysfunction and as the voltage goes down, the illness becomes more acute.

At the atomic level, the electron spin of the atoms provides the voltage that runs the cells. When the cells (tissue) are damaged and become distressed, the brain sends a signal for the body to send Bio-Negative electrical energy to increase the Negative voltage to help heal them.

Post PEMF Therapy Syndrome – Pg 2

Malabsorption often occurs from getting further sick while healing from another illness, which has used up all the body's reserve of donor electrons (Bio-Negative Energy). Subsequently the body has no Negative Energy Reservoir for the new condition, so instead of increasing their voltage to heal, the cell lose more energy and go down through a voltage threshold so low they do not have the energy to absorb the necessary nutrients to increase their metabolism and heal. Literally stuck with malabsorption and bad health.

How Does Magnetism Help Cells Heal

Whether the electrons are in the atoms in our our cells or the wires that run our lights and appliances, electricity is made and amplified by applying external magnetic fields to the electrons. The magnetism excites and amplifies the electron's spin which creates voltage.

Biomagnetism is the science that uses therapeutic magnetic fields to amplify the electrons to help normalize cellular voltage and function. By *properly amplifying* the electron's spin in the cells, their voltage and function is increased which directly assists in healing and achieving wellness.

Why does PEMF therapy cause disorientation and illness in chronically ill people?

In BiomagScience's therapy research in helping overcome EHS (Extreme Hypersensitivity) to EMF/chemicals/mold, it was found that the nature of the electron [at the atomic level in the biology of the human cell] *must spin freely without impediment* to maintain its energy (voltage); and,

The free spinning electron's energy (voltage output) is easily energized and amplified by a solid-state, uninterrupted external magnetic field.

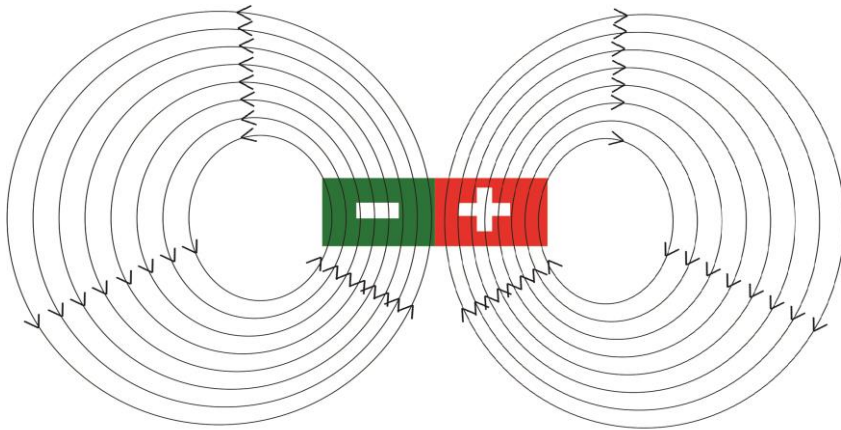

In researching the cause of EHS (extreme hypersensitivity) to external EMF (electro magnetic fields), BiomagScience found that these external pulsing magnetic fields were making people ill by systemically reducing their cellular voltage.

All EMF (electromagnetic fields) pulse. That means the electron's free-spin is suddenly being subjected to pulsing magnetic fields that start, stop/collapse, start, stop/collapse, continuously as many times per second as the EMF's frequency. This start/start pulsing mechanism directly affects, impedes and slows down the electron's natural spin which reduces its voltage output.

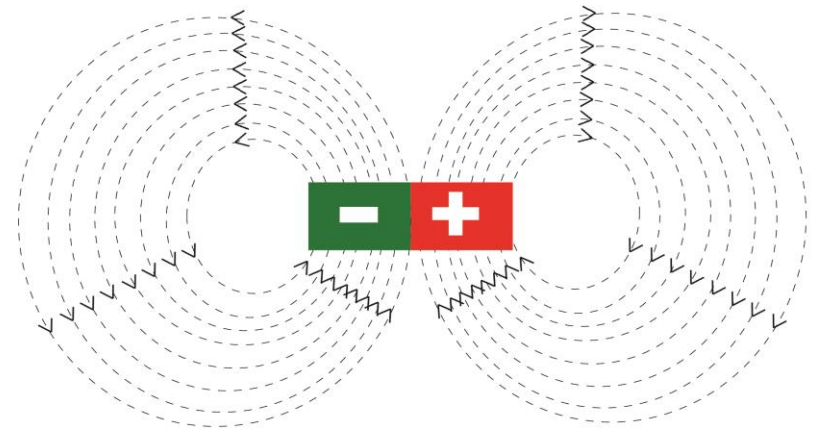

Post PEMF Therapy Syndrome – Pg 3

Since PEMF (Pulsed Electromagnetic Field) therapy has the same Stop/Start pulsing and interfering magnetic fields as EMF, it has shown to have the same depreciating cellular voltage effect on people already sick, subsequently creating malabsorption and causing greater dysfunction and more acute medical conditions.

Solid State Natural Magnetic Electron Spins

Pulsed (P EMF) Un-Natural Electron Spins

Conclusion

BiomagScience has found that the constant, natural energy flow of Solid-State Magnetic Fields is completely sympathetic to the electron's natural spin and is excellent in providing the proper energy to immediately increase cellular voltage for increasing function and healing support to overcome EMF/chemical sensitivity, post PEMF syndrome, chronic illness, and most medical conditions.

BiomagScience Final PEMF Statement

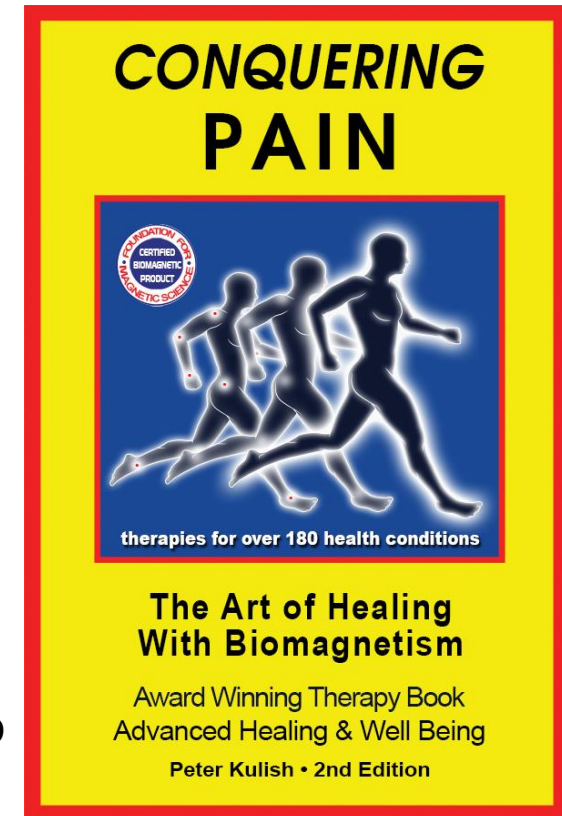

Having spent only months of research applying PEMF therapy on individuals for other various conditions other than Post PEMF Therapy Syndrome, BiomagScience does not have enough experience and is not qualified to comment about the efficacy of other PEMF therapy results. We have heard about good results, but again, because of our lack of knowledge and experience, cannot comment on them.

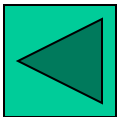

This award-winning book was written as the complete guide designed to help the individual follow step by step protocols for resolving over 180 A-Z simple, acute & chronically painful medical conditions, illness and disease.

Taught and used in curriculum wherever energy medicine is practiced, “Conquering Pain” contains diagrams and all the information needed to correctly energize & balance the body for increased energy, wellness and overcoming most medical conditions.

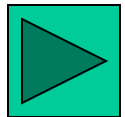

It explains the science of how increasing the cellular energy, increases function and immunity in overcoming medical issues. It contains the proper energy diagrams, so the correct Biomagnetic application is made to enhance and support rapid miracle-like healing.

Second Edition

Better Health through Supplemental Energy Medicine

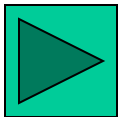

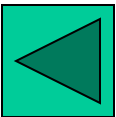

Wellness Kit

The Complete Energy Medicine Kit for First Aid and Simple, Acute and Chronic Medical Conditions

- 2 Super Biomagnets
- 4 Regular Biomagnets
- 6 Power Wafers
- 2 Water Jar Energizers
- 2 oz Activated Oxygen
- Conquering Pain Book over 180 Therapies
- Pictorial Guide with Advanced Therapies
- Quick Reference Brochure

Everything you need to do all the Advanced Therapies

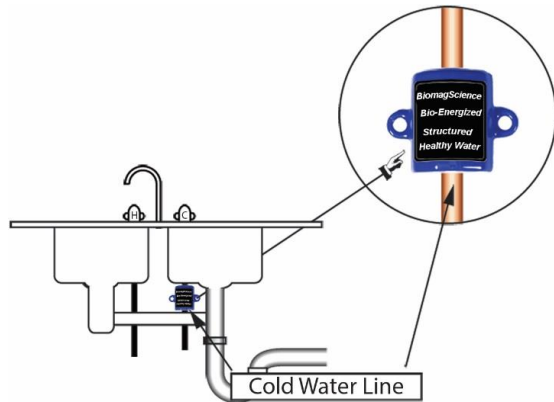

BiomagScience® Bio-Negative Structured Water

Water Tastes Great – Important for Health

Helps reduce toxins in the body
Reduce chemical buildup
Decrease sodium levels
Reduces blood sugar
Helps lower blood pressure
Reduces and reverses Alzheimer's
Increases hydration

Prevent premature aging
Reduce free radicals
Reduce and reverse acidosis
Improve kidney and organ functions
Improve memory functions
Increase metabolic functions
Increases Cellular nutrition and detoxification

Bio-Negative Energized Structured Water increases hydrogen and oxygen ions in the body – important for increasing health and wellness. Provides excellent healing support for treating poison ivy/oak, psoriasis, acne, burns, bed sores, cuts, and scrapes. This water is excellent for drinking.

Constant Flow Under the Sink

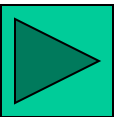

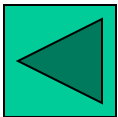

Water Jar Energizers

Shower or Sprayer Installation
Works on Bathtub Spouts and
all pipes - steel, plastic, etc.

The Conquering Pain book, explains the further benefits of Bio-Negative Energized Structured Water.

BiomagScience® Activated Oxygen

The Importance of Oxygen

Oxygen is the primary metabolizing and detoxifying agent of the body. All cellular tissue needs oxygen to function. A lack of oxygen at a cellular level (hypoxia) is the main cause behind many illnesses and diseases.

1. Supports cellular metabolism, energy production & detoxification
2. Stimulates the growth and development of normal, beneficial (aerobic) bacteria
3. Kills anaerobic bacteria
4. Provides an immediate Energy Boost

When individuals are very ill, the first thing they receive in the hospital is pure oxygen. Oxygen deprivation is one of the causes of a weak immune system and anaerobic bacteria. Increasing oxygenation strengthens the immune system.

What is BAO? BiomagScience Activated Oxygen is Stabilized Oxygen contains non-toxic, aqueous solution of oxygenates providing a high concentration of oxygen in a molecular form that is stable and will not become an oxide.

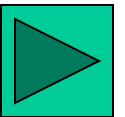

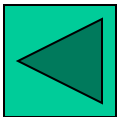

BAO is a safe method - drops are added to water – to support the body's oxygen levels . Oxygen plays a crucial role in the 21st century where pollution and stress sabotage our health.

BAO helps to address the needs of the body to ensure vitality, increased mental alertness, resistance to flu and many other health conditions.

**Extremely powerful when used with BiomagScience
Bio-Negative Structured Water**

For usage requirements and more about BAO, see the therapy book
Conquering Pain, The Art of Healing with Biomagnetism

The Ultimate Supplement

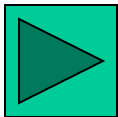

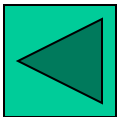

hGH - Human Growth Hormone - is the stuff of which science fiction is made. Imagine - it helps keep us YOUNG! Reports have shown proper levels of hGH reduce weight, hair loss, hot flashes and increase skin elasticity and muscle tone.

hGH is the primary catalyst for cell division. hGH affects every cell in the body. It helps to bring gland & organ functions back to youthful levels as it helps produce new young cells instead of replicating old ones. As an anti-aging hormone, it increases collagen helping reduce lines & wrinkles in the skin. The Ultimate supplement stimulates the body to enhance its own production of this anti-aging hormone. hGH has shown to lower the risk factors for heart attacks and stroke, improve oxygen uptake and to help prevent osteoporosis. It is crucial support therapy for Fibromyalgia or RSD in overcoming the low hGH symptoms of cramping, electric shocks and other painful discomfort.

BiomagScience has used and investigated most of the formulas that are available today and has found a laboratory that provides a bio-identical, natural hGH molecule. Clinical tests have shown that this molecule provides the one of the quickest responses available and it is safe and easy to us.”

The Natural Quick Acting hGH Supplement

BiomagScience® Circulation Enzymes

For dissolving Vascular & Cellular Plaque.

Eliminating vascular plaque: One of the most important supplements, BiomagScience Circulation Enzymes is an oral chelation that reduces and eliminates vascular plaque. Heart procedures to open blockages were cancelled. Circulation in the feet and legs are resolved. The chelating has provided increased circulation, weight loss and increased overall wellness.

Tests show plaque buildup in all age groups.

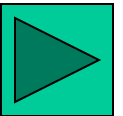

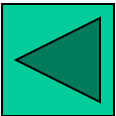

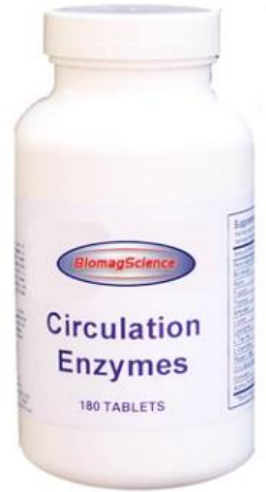

Vascular plaque is one of the most devastating health conditions that exists throughout the population. Unless there is high blood pressure or circulation problems, most individuals do not have symptoms of vascular plaque, yet many have plaque due to the general nature of diet and lifestyle.

Eliminating vascular plaque resolving Type II Diabetes - Circulation Enzymes taken in conjunction with BiomagScience Daytime therapy has shown to reduce the cellular plaque inhibiting communication and function of the pancreas. Reports that within a month, sugar & insulin values have normalized.

Using Circulation Enzymes and BioMagnetic Energy Therapy for three months has eliminated calcium in the aorta, reduced blood pressure and eliminated blood pressure medicine, reverse black feet from poor circulation.

BiomagScience suggests that everyone does a 3 month supplemental term with daily Biomagnetic energy once every decade of life for preventative health and wellness.

BiomagScience also suggests Bio-Negative Energized Structured Water be included with all therapies to increase cellular transport efficiency so important in supporting good health.

**The Foundation for Magnetic Science and BiomagScience is devoted
to your health and well being.**
